# 5 Questions to Predict a Cloud Data Breach

Data Inventory

1

Do you have an up-to-date inventory of your cloud data stores and the sensitive data residing in them?

## Identity & Access Inventory

2

Do you have an up-to-date inventory of your cloud identities, human and non human, with access to sensitive data?

Continuous Visibility

3

Do you always know who is accessing what data? Who is accessing your data now?

Assess Identity Access Vulnerabilities

4

Do you know the vulnerable pathways through which your data could be exfiltrated?

Baseline or Abnormal ?

5

Are you able to "baseline" authorized access versus rogue access?
